

Dr. Thomas Mote is a Distinguished Research Professor of Geography and Associate Dean in the Franklin College of Arts and Sciences at the University of Georgia, the nation's oldest state charter university. He received his bachelor's degree from the University of North Dakota with majors in geography and journalism, and his master's and doctoral degrees from the University of Nebraska-Lincoln with majors in geography. Dr. Mote is a scholar in climate science, and his research takes him to locations around the globe, from the Arctic to the tropics. He is most noted for his work involving the impacts of climate change on the Greenland ice sheet. He has published more than 130 journal articles and holds current grant funding from NSF, NASA, NOAA, and the U.S. Navy. Dr. Mote has been elected as a Fellow by the American Meteorological Society and the American Association of Geographers, and he is a former Fulbright Fellow to Brazil. He has received major awards from the university for research, teaching, and academic advising. Dr. Mote founded and served as director of the Interdisciplinary Program in Atmospheric Sciences before being appointed as the Head of the Department of Geography in 2011. Since 2016, he has served as Associate Dean, and his current responsibilities include leading faculty affairs and summer programs. He also serves as the divisional dean for the Physical and Mathematical Sciences.
