

Peter Vorobieff has taught at The University of New Mexico since 1999. Before joining the ranks of the academia, he has worked in a variety of places - from Russian Association of Space Explorers to Los Alamos National Laboratory (not to mention odd jobs as a news photographer, newspaper columnist, construction worker, etc.). His primary research interests lie in the areas of fundamental hydrodynamics and renewable energy. He serves as advisor to several student organizations, including Pi Tau Sigma honors society and Solar Splash solar-electric collegiate boat racing team.
